## ***Introduction: What is this and why all this?***

This is a list of short wave broadcasting stations from Subsaharan Africa for listeners worldwide. This is not a complete list of all somewhat African short wave stations and is not intended to be one, as it omits intentionally (almost all) stations from north of the Sahara, from South Africa and Swaziland, those broadcasting to Africa from somewhere else in the world, and African relays of external services from anywhere else. Why that? Mainly because their schedules are in general easy to find out somewhere else in the web (the stations homepages or Africa on Shortwave, see above). Also they are relatively easy to listen to.

I'm much more interested into the others which are more difficult to monitor: Many of them do not publish schedules, many even do not have a webpage, or it's outdated. Most stations from Subsaharan Africa also can't be heard via live stream or satellite, but only via SW. Often, frequencies are changed without announcement, stations disappear and sometimes reappear, or new stations appear out of the informational nothing. Within the DXing community, reliable and up-to-date information on these stations is sometimes hard to find, and there are quite a number of errors in the lists.

I try to collect, weight, condense and comment all this information with the aim to have an up-to-date, accurate and comprehensive reference, free to use but with no warranty. On the one hand, this list should give the actual (activity) status of the stations and frequencies, on the other hand it is an archive of somewhat „outdated“ information also, like at least a small selection of frequencies used in the past. I cannot keep a complete "backlist" of inactive stations and frequencies, but I try to refer at least to those I have some hope that they may be back on air sooner or later. To keep the list compact and easy to administer, I do not collect addresses and URL, QSL policy and similar information, you will find much of this in WRTH or zhr BDXC page.

Not any detail, however, will 100% correct and up-to-date. That's simply impossible. But if I do have serious doubts, you will find a remark on that. The same applies if I give information that it somewhat tentative, as this is better than no information.

## ***Part 1: Stations by Frequency***

### *Key to Frequency list*

column C	Official Status or Background of the Station
	blank      government or public station
	I          independent / commercial / non-governmental station
	P          station of political party
	R          religious / missionary station
	S          separatist / rebel station
	U          United Nations and/or Fondation Hironnelle
column D	Current Activity status based on observations in the past few months
	a          active or most likely active more or less regularly
	u          current status unconfirmed, not heard in recent months
	o          occasional use as alternative or additional frequency
	x          harmonic / mixing product
	j          likely used for jamming purposes or to escape jamming only
	s          sporadically reported, likely very irregular operation
	i          inactive or most likely inactive
	f          future plans / announced but unconfirmed
column E	power in kW if stated somewhere
column F	numbers: last known reception in year 20...
column I:	expectable signal strength in Europe if channel is clear, transmitter in good state and propagation allows
	++      very strong
	+      quite strong
	o      fair
	-      rather weak
	--      quite unlikely to catch it

Grey letters mean no positive logs for approx. two years or more; or an operation officially closed down or will considerably not return to SW.

<b>Angola</b>							
	RNA announced to install two new 25kW transmitters for 4950 and 7245/11955 in 2006 – at least the latter never happened. In October 2011 RNA announced to provide a new 25kW SW transmitter for the provincial service of Moxico (Luena). All provincial stations are inactive on short wave for many years.

<b>Cameroon</b>							
	<p>- For several years all stations in Cameroon seemed to be inactive on SW, from 2008 R. Buéa was heard again by Nigerian listeners, but any more not recently. Other Cameroon freqs. heard until 2000/2001: 4850 Yaounde, 5009 Garoua. It was reported some years ago that the government planned to invest in a new transmitter in Yaoundé.</p> <p>- There were hints towards a new SW station on behalf of "Bakassi Self-Determination Front" in DXLD 12-33, on 4.2/5.2 MHz, but likely never started.</p>

<b>Eritrea</b>						
<p>- A few years ago Eritrea operated seven SW transmitters at least (likely eight or nine in early 2011): 2x100kW + several lower powered, but now none are operated regularly; 2015 saw only a short period of activity in spring, when two transmitters were operated, and again from September 2016.</p> <p>- Many Eritrean opposition or clandestine programmes aired via foreign sites, schedules are quite variable (see Africa on SW on BDXC for details!). Some of these transmissions are relayed via ETH (see ETH entry)</p> <p>- possibly new station on 5940 emanating from Eritrea, reactivating one of the older transmitters formerly used to broadcast Radio Bana (closed 2009).</p>

<b>Ethiopia</b>						
<p>- About eight years ago ETH operated at least a dozen SW transmitters, about 10x100 kW and 4x10kW. Now there seem only six transmitters in use, producing relatively weak signals compared to what we heard a few years ago. Additional transmitters are used for jamming also.</p> <p>- Many Ethiopia opposition or clandestine programmes aired via foreign sites, schedules are quite variable (see Africa on SW on BDXC for details!), Several of them have been also relayed via Eritrean transmitters, but no recent reports.</p> <p>- Ethiopian Government jams oppositional programmes broadcast via Eritrea, as well VOA and Deutsche Welle with about six transmitters producing "white noise"</p> <p>- R. Ethiopia Ext. Sce. relays several target broadcasts to ERI (see 7235 for details), also additional transmitters may carry these broadcasts.</p>
